Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2661

1. The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

2. Claim 1 is rejected under 35 U.S.C. § 103 as being unpatentable over Nakano et al.

Regarding claim 1, Nakano et al (See Figs. 1-4 Col. 1, lines 35-65) disclose means for making frames from ATM cell assembling and cell pointer calculation and insertion substantially as claimed. The differences between the above and the claimed invention is the specific reference basis of the pointer. Note Nakano et al show pointer based on the first bit position of the virtual container (See Col. 2, lines 60-65) which is the functional equivalent of the claim. It would have been obvious to the person having ordinary skill in this art to provide a similar arrangement for Nakano et al because they are functional equivalents of pointer shown in the prior art.

3. Claim 2 is rejected under 35 U.S.C. § 103 as being unpatentable over Nakano et al in view of Dualt.

Regarding claim 2, Nakano et al (See Figs. 1-4 Col. 1, lines 35-65) disclose means for making frames with headers from ATM cell assembling and cell pointer calculation and insertion substantially as claimed. The differences between the above and the claimed invention is the specific reference basis of the pointer and the header. Note Nakano et al show pointer based on the first bit position of the virtual container (See Col. 2, lines 60-65) which is the functional equivalent of the claim. Dualt (See Figs 2-4) show typical AAL1 SAR-PDU headers with p and no-p type headers. It would have been obvious to the person having ordinary skill in this art to provide a similar arrangement for Nakano et al because they are functional equivalents of structures shown in the prior art.
